

DEMONSTRATION TRANSFORMER SET *AEM-100*

Consists of:
Laminated I-bar
Solid I-bar
300 turn coil
1200 turn coil
12000 turn coil
Copper wire
Moving iron meter
Compass
Diodes IN5408 (x2)

Laminated U-core
Solid U-core
30/30 turn coil
600 turn coil
1800/1800 turn coil
Clamp
Resistors
Steel washer
Lamp holder with lamp
Globes 12v & 6v

STANDARD SET

The AEM 100 is a set of demountable transformers that enable the student to construct a number of inductive devices with various combinations of turns-ratios and then study such parameters as the relation between input and output voltages, primary and secondary currents, prove Farady's law of induction, etc.
